# Happiness is a place

There are places that awaken a childhood memory that says:  
I'm home

**N**estled deep in the heart of Puglia in Southern Italy, Ostuni Art Resort is where friends and family come together to experience an authentic Apulian lifestyle. Located within 15 acres of olive groves, traditional crafts blend with modern comforts to create an unforgettable experience.

The resort centres around the trulli. These fairytale-like structures are uniquely shaped traditional buildings made of dry stone that are native to the Apulian area. The magical air within and around these buildings creates an enchanted

atmosphere that transports you to another time.

Ostuni Art Resort is a passion project by the architect Giorgio Angella and his brother Giulio, who dreamt of breathing life into the abandoned ruins. Using local craftsmen and traditional methods, they painstakingly restored the stone structures to their original beauty while adding elegant wooden terraces, a large swimming pool and bespoke design touches.

Now, contemporary art and furniture sit comfortably in the sun-drenched groves as if they'd

always been part of this beautiful and ancient landscape.

A variety of services can be provided on request, including a local chef who cooks traditional Apulian meals for guests, live music and traditional dancing, or a cheesemaker making mozzarella, all of whom can visit the resort. These experiences help to transport guests closer still to the genuine lifestyle of the people of Southern Italy.

The resort is an exclusive-use property for up to 20 guests or small groups of up to eight.

**The first five bookings will receive a special gift so don't hesitate to get in touch**
